Perfil

Fullstack Developer with strong expertise in modern web architectures, headless CMS implementations, and automation-driven workflows. Experienced in building scalable frontend interfaces and integrating backend systems, APIs, and databases to deliver performance-focused digital products.

Proficient in WordPress (traditional and headless), React-based ecosystems, and e-commerce platforms. Increasingly focused on AI-enhanced workflows, automation systems, and performance optimization across digital platforms.

Comfortable leading technical implementations end-to-end — from requirements analysis and architecture decisions to production deployment.

PROFESSIONAL EXPERIENCE

Grupo El Colombiano / Web Developer

SEP 2021 – PRESENT

Working as a web developer focused on both frontend and backend development, actively participating in the construction and maintenance of websites and interactive applications.

My role includes writing clean, scalable code and implementing technical solutions oriented toward performance optimization and user experience improvement. During this time, I gained solid experience working with Content Management Systems, especially WordPress, both in traditional setups and headless architectures. This allowed me to integrate the CMS with modern technologies, optimizing content delivery and facilitating management for non-technical users.

Freelance / Consultant & Developer

2021 - PRESENT

Implementation and customization of online stores using Shopify, WordPress, and VTEX, including:

- Payment gateway configuration
- Shipping methods setup
- Product catalog management
- UX optimization and performance improvements
- Integration of marketing and analytics tools

Focused on improving e-commerce management efficiency and business results.

Grupo El Colombiano / Functional Analyst

JUL 2021 – SEP 2021

Responsible for gathering business requirements and defining IT solutions. Also accountable for development oversight, testing, implementation, and user training of the delivered systems.

Grupo El Colombiano / University Intern

ENE 2021 – JUL 2021

In charge of SEO and performance optimization for company websites. Also responsible for receiving and implementing functional requirements based on specific site needs (most of the websites were built on WordPress).

Emtelco CX&BPO / Technical Support

SEP 2018 – AGO 2019

Provided technical assistance and solutions to users facing issues with products, services, and systems associated with the TIGO brand. Worked as a trained technology support professional.

EDUCACIÓN

Instituto Tecnológico Metropolitano

Information Systems Technologist

2017 - 2021

SENA

Multimedia Development and Integration

2014 - 2015
